	Early (Before 30, April 2009)	Late (After 30, April 2009)
PSIP members	300 €	350 €
Non PSIP members	400 €	450 €

2st ANNOUNCEMENT AND CALL FOR SUBMISSIONS
First PSIP Workshop 2009
Adverse Drug Events, Human Factors, IT Tool For Patient Medication Safety.

Goal of Workshop:

Adverse Drug Events (ADEs) endanger patients' safety and instigate considerable extra hospital costs. Therefore, a significant reduction of preventable ADEs is a challenging issue in Public Health.

To that end, the PSIP project will provide innovative tools giving relevant knowledge to healthcare professionals and patients by means of Information and Communication Technologies (ICT). The objective of this Workshop is to present methods, results and to discuss the following topics:

1. Identification of ADE and medication errors in hospital settings.
2. The role of Human and Organisational factors on ADE and medication errors.
3. The ICT solutions to prevent or correct ADEs and medications errors.

Papers and Key notes from the PSIP project and from international research at top level will be presented and discussed in a two day Workshop.

Scope:

We seek high-quality, original long papers, that address the above mentioned issues, in particular, human error, safety, and system development. This Workshop will offer the opportunity to compare ongoing research action, at International and European level by the EC focused on patient safety. For these reasons, in addition to standard presentations, a number of key note lectures have been planned on the themes of the Workshop. These are namely:

1. **David Bates**
   Vigilance and pateint safety (tentative title)
2. **Regis Beuscart**
   ADE detection approach of the PSIP project (tentative title)
3. **Peter Elkin**
   Electronic Quality monitoring for Medication Safety.
4. **Michele Carenini**
   The REMINE Project and the early identification and effective prevention of Risk Against Patient Safety (tentative title)
5. **Johanna Westbrook**
   The impact of electronic medication management systems on medication prescribing and administration errors, and doctors' and nurses' work in hospitals.
6. **Marie-Catherine Beuscart and Christian Nohr**
   Human Factors and prevention of ADEs (tentative title)
7. **Elske Ammenwerth and Werner Hackl**
   Review of IT methods to support patient safety
8. **Francesco Venneri**
   Managing the risk of patient handover – Rveiew of HANDOVER Project

Submissions:
Paper submission should follow the following procedure:
Full paper submissions :should describe substantial contributions of novel ongoing work that has produced advanced results. Accepted submissions, following a peer review process, will be presented during parallel sessions, and will be included in the Conference Proceedings. The Proceedings will be published by IOS. For submissions and detailed information via conference, please see the web site:
www.psip-project.eu
